Note that colors and gauges are not available in all profiles. The complete range of colors (Perspectra + and several others) is available on request. We recommend that you contact your MAC sales representative for availability and deadlines.

**Minimum slopes for roofing by paint system:**

Textural III

The minimum slope is 10 degrees (approximately 2/12) for steel roof profiles pre-painted with the Textural III paint system (polyurethane base paint system)

**Our colors Textural III: Metallic Grey, Black Onyx, Dark Brown, English Green, Red Sandstone, Blue Autumn, Charcoal Grey, Slate Grey**

Textural IV

The minimum slope is 15 degrees (approximately 3/12) for steel roof profiles pre-painted with the TEXTURAL IV paint system (PVDF-Poly Vinylidene Fluoride base paint system)

**Our colors Textural IV: Brushed Zinc, Zinc Quartz, Zinc Anthracite, Renaissance Bronze, Titanium Black, Titanium White, Bright Red and Copper Metallic**

**For information purposes:**

10 degrees of slope = 17.63% slope

15 degrees of slope = 26.79% slope

A minimum slope of 2/12 or 3/12 is required in relation to the warranty (for the appearance of the paint) and not with the waterproofing resistance of the MS1 & MS2 roof profile system.

Also note that all colors in the Perspectra Plus series (paint system based on polyester) require a minimum slope of 4/12.
