

CUSTOMER INFORMATION

Name : _____ Client Ref. No. : _____ Phone : _____

Responsible : _____ Email : _____

Address : _____ Project Name : _____

Metal Block Profile	Gauge : _____	Color : _____
----------------------------	---------------	---------------

Please fill in the following lines clearly indicating your needs :

A = Corresponds to the total length of the panel

B = Corresponds to the distance between the grooves (only if other than the standard which is every 24")

C = Corresponds to the measurement of the first groove starting from the right side of the panel

S clips (M16G) = When ordering S clips (M16G), you must confirm if the panel needs to be notched at the ends. An additional charge of \$0.10 per square foot will be applied. Indicate an «**N**» next to the panels quantity for those to be added.

IMPORTANT NOTES :

- **NOTCHE**
 - The panels cannot be notched if the measurements B and C are not identical.
- **GROOVES**
 - Distance can be from 12 in to 42 in. A minimum interval of 12 inches between grooves.
 - 1st groove needs to be place at a minimum of 6 in from the edge
- **MANUFACTURING TOLERANCE**
 - The groove positioning on the Metal Block profile may vary by up to $\pm 1/8$ in. from the specified dimensions. This manufacturing tolerance may result in a slight offset on either side.

ADD RIGIDITY TO THE ENDS OF THE PANEL

It is strongly recommended that you bend the ends of the panels before inserting them into the J Trim.

To ensure that you have the necessary excess to perform this operation, measurements should always be taken from one end of a wall to the other.
