Customer Address : _____	Project Name : _____	

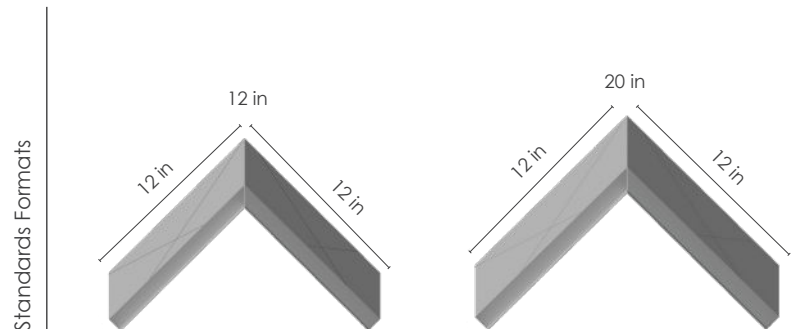

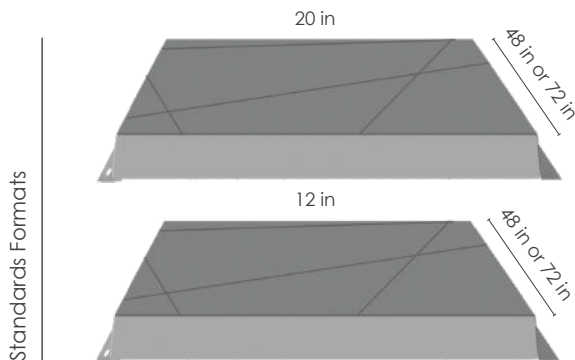

Polymac Axes redefines the expression of metal cladding through a pattern of raised lines integrated into each panel, creating a structured surface.

This surface treatment creates a unique interaction with light, generating depth, texture, and movement for a distinctive architectural signature.

Each panel format is available in 8 exclusive patterns, while corner panels are offered in 4 different pattern designs, providing a wide range of possibilities to create dynamic, customized façades.

Depending on the design intent, you may:

- select specific patterns to faithfully reproduce an architectural concept or visual;
- or choose mixed boxes including all 8 panel patterns or 4 corner panel patterns, allowing for a more random installation with an organic, rhythmic finish.
